

THANK YOU FOR CHOOSING SCAN-SUPPORT FOAM POSITIONERS

PLEASE READ INSTRUCTIONS BEFORE USE.

INTENDED USE

Scan-Support Foam Positioners provide exceptional patient support during imaging procedures where patients are required to remain in position for extended amounts of time. This product is made from durable materials that inhibit bacterial and fungal growth. Scan-Support Foam Positioners are latex-free, hypoallergenic and promotes stain and fluid resistance.

CLEANING

Abrasive cleaning agents are not to be used. Clients should pre-test a small area of fabric to guarantee that Scan-Support Table Pad performs as expected. The cover is not sterile when shipped. Sanitize it thoroughly upon arrival, and after each use, with a bleach/water solution as recommended by the Center for Disease Control or other controlling authority.

ROUTINE CARE

To disinfect, wipe the surface with a neutral detergent and lukewarm water. You may also use a hospital grade disinfectant.

TROUBLESHOOTING

Do not use if torn or damaged. Scan-Support Table Pad must be laid out when received and may take two days to expand to its actual size. For comments or concerns regarding your purchase, please email our Product Specialists at info@Scan-Bands.com or call (877) 824-7510 for technical advice.
